Features

The Autoguide Postmaster range holds a number of advantages over traditional falling weight post machines.

- Quicker
- Quieter
- More accurate
- Minimal ground disruption
- Minimal damage to posts
- Posts can take full load immediately
- Can be quickly removed if required

designed and built in the UK

www.autoguide.co.uk

The Mini and Midi Postmasters fit directly to the bucket pins and only require 2 hoses for operation. The high pressure motor seal is compatible with the excavator or loader auxilliary double acting hydraulic service.

The unit has a hydraulic post clamp which allows the post to be clamped for installation and/or withdrawal.

The jaws can be opened and closed by applying forward or reverse flow.

MODEL	MINI-POSTMASTER	MIDI-POSTMASTER
Force	50 kN	60 kN
Interface	Hydraulic Clamp	Hydraulic Clamp
Hydraulic Requirement	1 double acting service 25-35 l/min @200BAR	1 double acting service 35-45 l/min @200BAR
Max Post	Up to 6" (150mm)	Up to 8" (200mm)
