

5000 series

The Valley 5000 series provides a cost-effective irrigation solution for smaller fields up to 60 acres. This durable machine was created specifically for production agriculture and comes with the reliability and aftermarket support that only Valley dealers can provide.

Features:

- Economical irrigation option for smaller fields
- Another option to irrigating corners or irregularly shaped fields
- Easy to operate, control, and monitor
- Optional upgrades to enhance your control and monitoring capabilities
- Available with the Classic control panel for basic operations
